Love the cartoonish graphics and controls are really fast and smooth. Love the animation and the way my mech looks. For 1.99, this game is a fun retro-ish shooter arcade game. Would love to see the developer expand on this more. Keep the graphics and controls the same but add more features. Add more weapons that can be switched too. Missiles, machine guns, Bombs and mines. Create an open world and missions to go on.

The game is very linear and the weapons feel pretty much the same.. I played for what felt like an hour but probably 15 minutes before I realized there's not much of a point here. There's a blue and a pink upgrade. Your bullets change colors but you can't fully tell if you're supposed to be collecting them both or just one color to power up that color. and the levels are a few minutes long and just ultimately repeat. the mobs get a little bit harder and your guns get a little bit more powerful every level in this infinite battle. There's no scores, no loot, not even an indication of what level you're on. it's just you and your bullets against them and their bullets. forever.
